

# DON'T LET YOUR PROJECTS FLATLINE

SCHEDULE YOUR  
**PROLOG**   
HEALTH CHECK  
TODAY

## PERFORMANCE HEALTH CHECK

Once you've successfully implemented your Prolog solutions and are enjoying the benefits of the leading construction project management software there's still room for improvement. It's tempting to stand back and let your system hum along productively but in the ever-changing landscape of construction tech that can have a major impact on your bottom line. Our Health Check service can protect and increase the return on your investment by ensuring optimal health of this critical component of your business.

Maybe you need to decrease the load on IT while increasing your organization's optimization of available resources, or maybe you're wondering if you can maximize resources already allocated to Prolog to accommodate service demands better. It's also common that as a system matures, the minor tweaks and changes over time begin to add up to significant system impact. Are you under provisioned? Over-provisioned? Can you rework your existing configuration to get more efficiency? We can help in all these areas.

Our Prolog Health Check helps you get more from the cost of ownership by maximizing system efficiency and by anticipating service demands across the enterprise. As part of the Health Check, one of our highly trained team members will perform a comprehensive evaluation of your:

### BUSINESS PROCESS AND THEIR RELATIONSHIPS TO PROLOG

- Allow for the ever-increasing need to collaborate with project stakeholders outside of your organization
- Ensure business processes are incorporated into Prolog, rather than Prolog dictating business processes
- Screen customizations to add necessary fields/re-purpose fields/remove fields from Prolog Converge view
- Removal of unnecessary modules/forms
- Re-purposing of forms for other business processes
- Verification of custom settings for portfolios/projects

### SECURITY

- Analysis to determine if the security groups should be combined, updated, or expanded
- Review of current settings, and ensuring new features have been updated

### LIST/LOOKUP GROUPS MAINTENANCE

- Streamlining of list memberships for ease of use
- Making lists accessible for the appropriate groups

### REPORTS

- Streamlining of critical reports and removal of legacy reports
- New report recommendations and implementations based on data reviewed

### VIEWS

- Ensure all fields necessary for daily operations are present
- Organization and additions of views based on business needs

### NOTIFICATIONS

- Review of active notifications
- Activation and customization of system notifications

### WORKFLOW

- Review of in-place workflow
- Customization of workflow templates

THE EXPERTS IN DESIGN, BUILD AND OPERATE SOLUTIONS

# AVOID HEADACHES, GET A PROLOG HEALTH CHECK TODAY
